

Aon eSolutions Audit Engine and Specialty Technical Publisher

Combining Aon eSolutions with STP Publishers's OSHA & EPA Audit Compliance Content

To help remedy the challenge of standardizing the business processes around safety and environmental auditing, *Aon eSolutions and STP have partnered to provide a unique automated solution.*

The Specialty Technical Publisher (STP) Audit Libraries are “pre-loaded” into the Aon eSolutions Audit Engine. Automatic, quarterly updates are available for all the audits to ensure compliance. Clients can subscribe to one or more of the STP libraries, and then conduct the audits/inspections using Aon’s web-based tools, mobile tools, or the PC offline option.

Aon eSolutions has been providing its online Audit module to organizations in a multitude of industry sectors for over 10 years. Aon eSolutions Audit module is a comprehensive tracking and reporting system that provides a centralized platform for analysis of audit and recommendation data for each location. Audits and assessments can be completed and submitted for each location on the system by corporate staff, site level users, or third party users.

Specialty Technical Publisher a leading publisher of Environmental, Health and Safety, Fire Codes, and DOT Hazardous Materials manuals. Established in 1986, STP is a recognized leader with its range of comprehensive, easy-to-read content for the United States, Mexican, International and Canadian Laws and regulations.

KEY BENEFITS

- Unique combination of best of breed solutions:
STP Content delivered through the Aon eSolutions Web-based Audit Engine
- Web-Enabled STP Safety & Environmental Audits
 - Audits available for Federal OSHA & all 50 States
 - General Industry OSHA 1910 and Construction OSHA 1926
 - Federal Environmental Audits & all 50 States
- Maintain OSHA and EPA Compliance
- Easy to Use
- Includes Reporting
- Correction Actions Tracking / Email Triggers
- Applicability Tables / Profile Questions
- User-defined roles & functionality (site level user, multi-site auditor, etc.)
- Economical & Efficient

KEY FEATURES

- **Access to Audit Library.** Clients can select from a library of audits written by STP’s experts in compliance and best practices.
- **Applicability Tables / Profile Questions.** System is flexible enabling users to only see sections that are relevant to their operations.
- **Action Items Tracking.** The system will track all action items generated until resolution, enhancing control and accountability at the site level.
- **Mobile PDA/Tablet PC Compatibility.** Mobile PC allows audits and self-assessments to be conducted electronically anywhere, at anytime. Mobile PC systems act primarily as

data collection tools while safety professionals are away from the office. iPad coming soon!

- **E-mail Functionality.** Automatically send e-mail alerts when action items are generated by the system. Action items can be tracked through completion.
- **Roll-up reporting.** Provides real-time data to a multitude of reports to use for data comparative analysis and compliance benchmarking.

STP AUDIT LIBRARY AVAILABLE THROUGH AON eSOLUTIONS:

- **OSHA Auditing - Federal Compliance Guide: Facilities** is a tool used to assess a facility's compliance with the Occupational Safety and Health Administration's (OSHA) regulations for 29 CFR 1910 and general record keeping requirements for 29 CFR 1904. This *Guide's* primary purpose is to provide a protocol to help both experienced and newly qualified auditors to thoroughly identify the regulatory compliance challenges facing a facility. This *Guide* covers the "General Industry" section of the OSHA regulations and can be used throughout the United States by most manufacturing and service facilities. The *Guide* is written in clear language; its many detailed checklists have been field-tested by STC's own health and safety compliance auditors. To ensure that the information is kept up-to-date, the annual subscription includes updates.
- The **OSHA State Differences Summaries**, available for all 50 states, sets out all the important (and often complex) regulatory differences from the similar federal rules with which facilities in that locale must comply. These detailed materials have been compiled to complement STP's **OSHA Auditing: Federal Compliance Guide**. Using the federal guide along with the summary for a particular state makes it feasible to identify the full range of health and safety regulatory compliance challenges facing a facility. As a result, the company can confidently perform an internal self-assessment of its ongoing compliance, or arrange for an external audit. STP's state materials are the perfect tool to monitor state health and safety regulations to understand exactly how they differ from the underlying federal regulations. Quarterly updates by STC's experts ensure that these unique products always reflect current state OSHA regulatory requirements. STP's **OSHA State Differences Summaries** have undergone thorough field-testing by STC's experienced health and safety compliance auditors.
- **Environmental Auditing: Federal Compliance Guide** is widely recognized as the country's premier checklist to ensure effective compliance with the hundreds of complex environmental regulatory requirements facing a typical industrial facility today. According to The Audit Roundtable, over 60% of professional environmental auditors regularly use this STP *Guide* to assess a facility's compliance with applicable federal environmental regulations. Special applicability tables help each user determine exactly which regulations actually apply to their particular facility. The *Guide's* many detailed checklists have been field-tested by STC, a firm increasingly recognized as a leader in environmental, health and safety auditing. To ensure the information is kept up-to-date, the annual subscription includes updates.
- The **Environmental State Differences Summaries**, available for all 50 states, sets out all the important (and often complex) regulatory differences from the similar federal rules with which facilities in that locale must comply. These detailed materials have been compiled to complement STP's **Environmental Auditing: Federal Compliance Guide**.
